

Dear Representatives,

Please add your support to the passage of Bill #5915, supporting legal practice for accredited homeopaths. My family has been helped so extensively by homeopathy over the years, that I feel I must ask for your support. In a medical climate so overtaken by pharmaceutical drugs and paid advertisement, we need our politicians to stand up for us and for some natural holistic alternatives. Otherwise all natural medicine options will be erased by the gargantuan efforts of big Pharma. It is really important to the health of your constituents that they are allowed to see and exercise their options when they are ill. Pharmaceuticals are wonderful when you really need them, but why not first try a gentler approach and see how well it works--as it often does. Thank you so much for considering adding your support to our bill. It will have a significant impact on the health of your constituents in the long run.
